

ANDRÉS ESPITIA

Backend Developer

ABOUT ME

I am a Systems Engineering student with technical training in systems and computing, as well as experience in competitive programming. I have a strong command of languages such as Java, C++, and Python, along with experience in Arduino. I am also proficient in relational databases (Oracle, MySQL) and non-relational databases (MongoDB), as well as frameworks like Spring Boot. My main focus is logical development oriented towards the backend, and I have worked with the Scrum methodology.

I consider myself a responsible and punctual individual with excellent interpersonal skills. I adapt easily to change and am always eager to learn and improve. I enjoy working in teams to achieve objectives and meet both short- and long-term goals. Additionally, I possess a strong sense of commitment, organization, creativity, and problem-solving skills.

EXPERIENCE

2024 Programming Tutor
El Bosque University

EDUCACIÓN

2026 Systems Engineering (in course)
El Bosque University

2021 Industrial technical high school graduate with an emphasis on systems and computing.
Escuela Tecnológica Instituto
Técnico Central la Salle

SKILLS

Problem Solving

Teamwork

Effective Communication

Adaptability

Critical Thinking

Organization

Proactivity

Creativity

TECHNOLOGY

Java SE (8-17)

Spring Boot

C++(98 - 14)

MySQL

MongoDB

Python 3

Git / Github

Angular
